Sees everything, thinks for you.

The thermal imager testo 883 with the best image quality and automatic image management – the efficient reinforcement for service technicians.

Your helping hand: The testo 883 thermal imager.

It's time for reinforcements.

In maintenance and facility management, your day-to-day work can make all the difference between experiencing a successful day with attained production targets or painful losses due to unplanned downtime.

And as if that weren't enough, your work is further complicated by constant time pressures, administrative efforts that aren't very productive and inadequate tools.

We think you deserve a helping hand. Reinforcements in the form of an instrument that sees everything of importance in your job and can even do the work for you thanks to its practical functions. Find out all about the thermal imager testo 883.

— **Benefit from outstanding image quality.**

Infrared resolution of 320 x 240 pixels, expandable to 640 x 480 pixels with the built-in testo SuperResolution technology. In addition, you always have full control over the thermal image thanks to the manual focus.

— **No need to manually assign images on your PC ever again.**

The testo SiteRecognition technology automatically assigns thermal images to the correct measuring location following an inspection route.

— **Work within a network.**

Use the testo Thermography App for quick analyses on site or integrate the readings of the testo 770-3 clamp meter into the thermal image.

— **Experience exceptionally intuitive operation.**

The clever combination of touch display and the tried-and-tested Testo joystick will make your work processes smoother and more efficient.

— **Enjoy flexibility.**

Simply switch from the standard lens to the telephoto lens for high-precision thermography of even distant objects.
